## **Manter MBP** Automatic Bag Placing

SAB (semi automatic) with MBP

### **MBP (Manter Bag Placer)**

Compact machine that can place, through automation, single Mesh bags under the filling hole of a semi automatic bagger.

In combination with an SAB it is an ideal solution for packing into individual bags. The MBP can also be placed with other semi automatic baggers.

The individual bags have to be equipped with a plastic strip and two holes punched in.

After the MBP is installed individual bags can still be placed manually.
